Dear Regents Professor Lewis:

This is to confirm that no expenditures, no encumbrances, nor any distribution of your pioneering "OMICS" NASA federal grant funding are to occur without your explicit agreement and direction.

As you know, any attempt by others, such as university administrators, to place any individuals on this project without your approval, or assign expenditures not for the project, would constitute fraud and/or misuse of competitive federal funds.

We are very excited about the upcoming ISS study.

Best of luck, and see you all soon!

A handwritten signature in black ink, appearing to read "Howard G. Levine". The signature is fluid and cursive, with a long horizontal line extending from the end.
