New Asymptomatic COVID-19 Testing Options Offered Through Pullman Regional Hospital as of June 12, 2021

Pullman, WA— In March of 2020, Pullman Regional Hospital initiated the COVID-19 Testing and Triage Center. We administered thousands of tests and, at times, tested hundreds of people a day. Fortunately, the need for testing people with symptoms has steadily declined as more and more people receive their COVID-19 vaccine.

We recognize the need today is for asymptomatic testing, for people who don't have symptoms but need a test to verify they are ok to travel, or for work or prior to a procedure. To respond to our community's needs, Pullman Regional Hospital is transitioning from our COVID-19 Testing and Triage Center to as-needed testing for asymptomatic individuals.

As-needed testing for patients in our care—emergency, inpatients, and prior to procedures scheduled at our hospital—will continue.

New asymptomatic COVID-19 testing options as of June 12th:

If you're asymptomatic (you don't have COVID-19 symptoms), and you need a COVID-19 PCR nasal swab test for travel, work, a medical procedure, or for peace of mind, Pullman Regional Hospital can help.

FOR TRAVEL: Call (509) 336-7359

- Open Monday, Tuesday and Thursdays from 10am to 3pm
- **No doctor's order needed**
- Results in 72 hours on your hospital patient portal
- \$129 fee

FOR ASYMPTOMATIC TESTING, WITH A PROVIDER'S ORDER

- **With your provider's order**, we will provide a self-collection kit at the hospital **Emergency Department registration desk**
- Instructions will walk you through how to easily perform your own nasal swab
- For best results, we recommend you do your nasal swab on-site (in your car) and return your completed kit to the hospital ASAP
- Results in 72 hours on your hospital patient portal
- Most insurance providers cover tests ordered by your provider

OTHER COVID-19 TESTING OPTIONS

- If you have symptoms of COVID-19 or have had an exposure, call your doctor's office
- Pullman Regional Hospital will continue to provide COVID-19 testing, as indicated, for emergency patients, inpatients and patients needing pre-procedure testing who are scheduled for a procedure at our hospital
- If you're having a procedure at a different facility but want to test here, you can obtain a self-collection kit—with your provider's orders
- Additional testing options in Pullman can be found on Whitman County Public Health's website
